

# Creating a Photoshop Cover

- Email your representative to get your cover dimensions for the Photoshop file. This is critical. Do not begin designing in Photoshop until you have this information.
- Open Adobe Photoshop and create a document size to match the dimensions you are given.
- Be sure the artwork is created at 300 dpi.
- Be sure to use a readable font as some script fonts may be unclear.
- Do not “flatten” your layers and be sure to create Separate layers for any titles or spine copy.
- Save file as a PSD Photoshop file **and** RGB TIFF file and submit both to your plant.
- Burn a cd and submit separately from your pages and clearly indicate your school name and job number on the cd. Remember to include a print out.

Create separate layers for each part of your cover including type.

Be sure to input your file size and 300 dpi for best results

# Understanding Your Cover Dimensions

## Front cover

Front cover pictured above lying open and flat

### Example:

80 lb paper, size 8      80# Board

	Spine	view area	with 3/4 bleed
128 pages	1 1/16	11 1/4 x 17 13/16	12 3/4 x 19 3/16
144 Pages	1 1/8	11 1/4 x 17 7/8	12 3/4 x 19 3/8
172 Pages	1 3/16	11 1/4 x 17 15/16	12 3/4 x 19 7/16
200 Pages	1 1/4	11 1/4 x 18	12 3/4 x 19 1/2

Above dimensions assume a 8 1/2" x 11" yearbook with standard 80lb paper. If using other please call.
